Context

The Centre hospitalier universitaire vaudois (CHUV) is one of the 5 Swiss university hospitals. Thanks to its collaboration with the Faculty of Biology and Medicine of the University of Lausanne and the EPFL, the CHUV plays a leading role in the fields of medical care, clinical research and training.

Deployed over several sites, the Lavigny Institution consists of a neurological hospital providing inpatient and outpatient services, two accommodation departments for adults with disabilities, with intellectual disabilities or with physical problems, a specialist school and a workshop and professional training sector.

The inter-institutional University Neurorehabilitation Service ( SUN ) brings together the neurorehabilitation structures of the CHUV and the Lavigny Institution, and belongs to the Department of Clinical Neurosciences of the CHUV. The SUN provides cutting-edge care for neuroinjured patients, with particular expertise in the fields of cognition and behavior, spasticity, neuromuscular diseases, and neurourology.

The SUN covers the entire neurorehabilitation pathway, with an Acute Neurorehabilitation Unit (2 beds for patients after waking up from a coma and a mobile team providing early neurorehabilitation care, a few days after the onset of the neurological injury), two post-acute neurorehabilitation hospital units (75 beds between Lavigny Hospital and CHUV), an outpatient neurorehabilitation center at CHUV, as well as the NeuroRehab Research Center allowing SUN patients to access translational research and innovative treatment technologies and approaches.

The SUN ensures close links with the Departments of Neurology, Neurosurgery, Spinal Surgery, and the Leenaards Memory Centre in the DNC, optimising the care of patients requiring neurorehabilitation.

250 people work within the scope of the inter-institutional SUN. The SUN medical team reports to a single Head of Department at CHUV and is composed of 5 senior doctors, specialists in neurology and/or physical medicine and rehabilitation, 7 clinical heads and 10 assistant doctors.

#### Assignment

You supervise admissions, visits, assessments and interdisciplinary colloquia of patients hospitalized in neurorehabilitation at CHUV or at Lavigny Hospital.

You participate in specialized outpatient neurorehabilitation consultations at CHUV , particularly in the areas of cognitive neurorehabilitation, neuromuscular diseases and spasticity.

You supervise and coordinate the activity of the Department's assistant physicians

You provide the interface and collaborate with all the interdisciplinary teams contributing to the care and well-being of the patient and their loved ones.

You do the SUN picket rotations (nights and weekends)

You participate in SUN and DNC training courses

You participate in research projects , particularly in neurotechnologies.

#### Profile

You hold a federal medical diploma or a qualification deemed and recognized as equivalent by Mebeko

You demonstrate interest in academic neurorehabilitation

You demonstrate a sense of organization and team support

You have a good ability to integrate quickly into new teams , having good interpersonal and interpersonal skills.

You have a sense of hospitality and listening, and demonstrate empathy.

For the position of clinical head :

You hold an FMH in neurology or physical medicine and rehabilitation (or a qualification deemed equivalent by Mebeko) and you have a C1 (DALF) level in French (required)

For the position of deputy clinical head :

You are in principle one year away from your FMH qualification in neurology or physical medicine and rehabilitation (or a qualification deemed equivalent by Mebeko) and you have a B2 level (DELF) in French.

#### We offer

Becoming a collaborator of the Vaudois University Hospital Center means you are guaranteed to benefit from:

Top-notch social benefits, 20 days of paternity leave and 4 months of maternity leave (with the possibility of an additional month of breastfeeding leave)

Regular salary progression adapted to responsibilities

A 13th salary and 25 days of vacation per year

A right to a minimum of three days of training per year, with access to a varied offering within the CHUV Training Center and partner training centers of the State of Vaud

Easy access to one of the 500 furnished accommodations offered in the surrounding areas for people moving to Switzerland from abroad

Social, cultural and economic benefits offered to members of the H-Oxygène association.

Benefits offered as part of the mobility plan (discounts on public transport subscriptions, promotion of "Mobility" vehicles and discounts on the purchase of electric bicycles)

Hotel-quality corporate restaurants in each of the hospital buildings with preferential rates.
